

IG Secure Clinical Photography

The No-Hassle Way

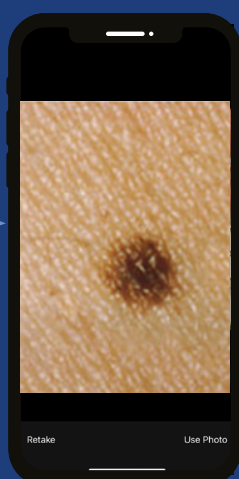

The most accessible camera in your practice is likely to be your mobile phone. The free Consultant Connect App simply allows you to take IG secure and GDPR compliant clinical photos on your mobile phone when you use the PhotoSAF feature.

This is a service commissioned by your local CCG/Health Board/Trust, so it's free to your practice.

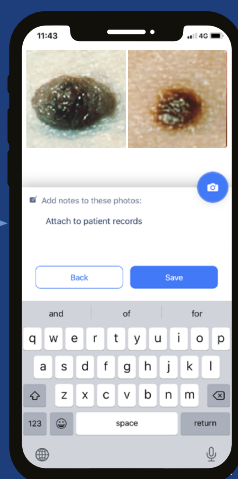

How it works:

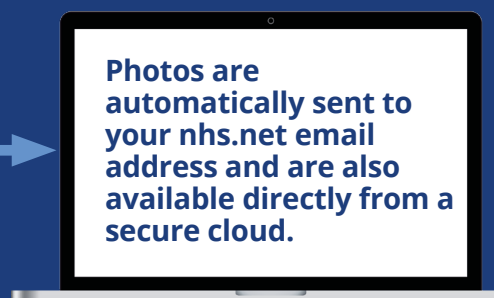

Confirm patient consent

Take one or multiple photos

Add patient's NHS number and notes

Photos can then be saved to patient records or sent to other clinicians via e-RS or email as appropriate

We are here to help you

Practice staff can be given access to clinical photos so they can upload them to a patient's record.
