

# Did you know...

... the Consultant Connect App can be used to easily contact other clinicians?

Like a pre-programmed phone directory. We can set up your access so you can:

-  **Make cross-hospital calls**  
Contact other specialists to discuss internal referrals or to speak with community teams.
-  **Contact local GPs**  
GP bypass numbers are available on the app, to enable healthcare professionals to bypass the queue in order to speak to a GP surgery. These are only to be used for urgent clinical and admission avoidance advice or referrals.\*
-  **Communicate between multidisciplinary teams**  
Smaller teams of consultants or nurses who would typically work together to discuss a patient case can be set up.
-  **Take and share IG secure Photo Messages**  
**Easy to view message history, for group or clinician-to-clinician conversations.**

\*Bypass numbers are currently only available in certain areas.

Please note available specialties will differ by hospital and/or locality

If you are interested in setting this up, please get in touch:
