

# Did you know...

...you can use the IG-secure Messaging feature, via Consultant Connect, to easily contact other clinicians?

## Benefits and key features of Messaging

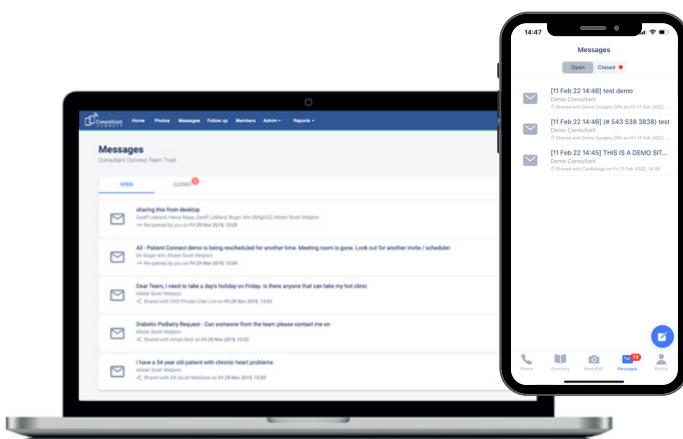

- Seamlessly sync all your clinical conversations
- IG-secure and GDPR-compliant
- Designed specifically for NHS clinicians
- For group or clinician-to-clinician conversations
- Get notified when there's a new message
- Easy to view message history

## How it works

- Select 'Messages' on Consultant Connect in the app or your browser.
- Select a specialty\* or clinician and type your message. If appropriate, take a photo(s) or upload image(s)/files to include with your message, and press send.
- You will receive a notification when someone responds to your message.
- At the end of the conversation, either you or the responding clinician can 'close' the message and leave an outcome.
- The conversation thread is securely saved and can be downloaded as a PDF.

\*Specialties available will differ by Health Board and/or locality.

**The outcome of the conversation and all the case information are available via your browser in real-time.**

These can be accessed by clinicians/relevant individuals from the respective organisations.

**If you are interested in setting this up, please get in touch:  
E: [hello@consultantconnect.org.uk](mailto:hello@consultantconnect.org.uk) T: 01865 261 467**

**Download the free Consultant Connect App from the App Store or Google Play.**
